

From A Framed Work Of Art To High Definition Television

ArtScreen is custom made to fit all LCD or Plasma screen sizes and now accommodates most major front panel surround-sound audio systems.

ArtScreen is also available for wall mounted projection screens.

In addition to the vast online art gallery, photography, family portraits and other personal art can be used to truly customize the display of your ArtScreen system.

Motorized Art System

View artwork and frame selections at www.vutec.com

ArtScreen transforms an LCD, Plasma TV or video projection screen into a work of art. Inside a beautiful hardwood frame, the artwork ascends or descends with the touch of a remote. When the screen or television is not in use, the digital art-on-canvas image of your choosing is displayed within the frame. When your artwork is retracted, the video display is visible for viewing.

Our galleries display a vast array of frame styles, liners and artwork choices for reproduction. For personalized art, custom artwork or personalized photographs can be reproduced to create an individualized or more glamorous work of art. Both recessed and surface mount versions are available to complement any interior design or décor.

ArtScreen is available for video displays from 32 inches to over 65 inches. Custom sizes can also be accommodated.
